EXPERIENCE

Perfect Ventures · Founder's Office Intern — Jun 2026 – Sep 2026

0→1 launch of Meesho AI Services, an AI-led after-sales CX service for consumer electronics brands

- Defined target segments, ICPs, positioning and channel mix for the launch, setting which accounts sales pursued first.
- Led customer discovery across target accounts; turned buyer pain points into a rebuilt pitch and demo flow, refined through mock client calls with leadership.
- Built the consultant partner network and onboarded early clients end to end, coordinating sales, delivery and leadership.
- Automated outreach and follow-ups with n8n and AI workflows, removing repetitive manual work from the sales cycle.

Codven Solutions · Project Coordinator — May 2025 – Apr 2026

- Owned delivery of client software projects from discovery to launch as the single point of contact across business, design and engineering.
- Converted stakeholder requests into scoped user stories with acceptance criteria, validating each against user and business goals before build.
- Prioritised work by impact, effort and deadline; managed scope changes and dependencies to protect release dates.
- Surfaced delivery risks early with mitigation plans and kept trackers and status reports current for leadership.

PRODUCT WORK

Procurement System, Hard Chrome Tech · Built & deployed, in daily use — Case study

- Identified that purchasing ran on paper and spreadsheets with no view of vendor dues or late deliveries; built an SQL-backed system covering vendors, POs, goods receipt, invoices, payments and a vendor ledger.
- Now tracks 9 vendors, 18 items and 8 purchase orders worth ₹72 L+ in one place; the dashboard surfaces dues and overdue deliveries instantly.
- Key decisions: automatic GST split from the vendor's state; AI bill reading with mandatory human confirmation; alerts for missing GST rates.

Volt Money: Loans Against Demat Mutual Funds · PRD + prototype — PRD · Case study

- Found demat holders invisible to the eligibility engine: a ₹16 lakh portfolio produced an ₹11,045 limit against a ₹25,000 minimum loan.
- Wrote the PRD: sized a ₹260–1,050 Cr loan-book opportunity, 16 prioritised requirements, success and guardrail metrics, and a phased rollout; built a clickable prototype.
- Mined Play Store reviews and added servicing requirements after finding post-loan issues drove most complaints.

Fintech Case Studies · Problem → insight → solution → metric

- **Upstox**: beginner mode with a guided starter SIP and one-tap UPI fund-add to lift KYC-to-first-investment rate.
- **GoodScore**: 90-day credit plan built on the two highest-impact actions to turn one-time score checks into repeat use.
- **True Balance**: repayment calendar, plain-language UPI AutoPay and pre-due reminders to raise first-EMI on-time rate.
- **Stable Money**: trust panel at booking and deposit-split guidance to lift browse-to-first-FD conversion.

SKILLS & TOOLS

Product: problem discovery, user research, PRDs, prioritisation (RICE, impact vs effort), funnel and drop-off analysis, metrics design, prototyping, go-to-market, stakeholder management

Fintech: digital KYC, UPI and AutoPay, Account Aggregator, lending funnels, loans against securities, credit bureaus, deposit insurance, RBI digital lending basics

Analytics: SQL, Google Analytics 4, Google Search Console, Advanced Excel

Design & docs: Figma, Notion

Automation & GTM: n8n, AI and prompt workflows, LinkedIn Sales Navigator, Apollo, Lusha, Lemlist

CERTIFICATIONS & EDUCATION

Product Management Certification, HelloPM — In progress

Agile Scrum · Digital Marketing & SEO, Simplilearn

Bachelor of Business Administration, IIMT Group of Colleges — 2022 – 2025
